

CLAIMS

What is claimed is:

1 1. A device for carrying paint and a paint roller, comprising:
2 a first storage compartment having an open top, the first storage compartment
3 sized to accept a paint roller and paint;
4 a first clip means for retaining the paint roller at a specified location within the
5 first storage compartment; and
6 a means for attaching the device to a painter wherein the paint roller is
7 perpendicular to the body of the painter.

1 2. A device for carrying paint and a paint roller as described in Claim 1,
2 wherein the first clip means acts to retain the paint roller such that the paint roller is not
3 submerged in the paint.

1 3. A device for carrying paint and a paint roller as described in Claim 1,
2 wherein the attachment means attaches the device to a belt on the painter.

1 4. A device for carrying paint and a paint roller as described in Claim 1,
2 wherein the attachment means is a shoulder strap.

- 1 5. A device for carrying paint and a paint roller as described in Claim 1,
2 wherein the device further includes a support element for maintaining the device in an
3 upright position.

- 1 6. A device for carrying paint and a paint roller as described in Claim 5,
2 wherein the support element is a foldable support beam.

- 1 7. A device for carrying paint and a paint roller as described in Claim 5,
2 wherein the support element is an extension added to the bottom surface of the device.

- 1 8. A device for carrying paint and a paint roller as described in Claim 1,
2 wherein the further includes a second storage compartment.

- 1 9. A device for carrying paint and a paint roller as described in Claim 8,
2 wherein the second storage compartment is sized to accept a paint brush.

- 1 10. A device for carrying paint and a paint roller as described in Claim 8,
2 wherein the second storage compartment includes a second clip means for retaining the
3 paint brush at a specified location within the second storage compartment.

1 11. A device for carrying paint and a paint roller as described in Claim 10,
2 wherein the second clip means acts to retain the paint brush such that the paint brush is
3 not submerged in paint.

1 12. A device for carrying paint and a paint roller as described in Claim 1,
2 wherein the first storage compartment is made from a non-porous, durable, lightweight
3 material.

1 13. A device for carrying paint and a paint roller as described in Claim 1,
2 wherein the first storage compartment is made from a material selected from the group
3 consisting of plastic or lightweight metal.

1 14. A device for carrying paint and a paint roller as described in Claim 8,
2 wherein the second storage compartment is made from a non-porous, durable, lightweight
3 material.

1 15. A device for carrying paint and a paint roller as described in Claim 8,
2 wherein the second storage compartment is made from a material selected from the group
3 consisting of plastic or lightweight metal.

1 ~~423~~ 16. A device for carrying paint and a paint roller as described in Claim 1,
2 wherein the device further includes an insert for the first storage compartment.

1 17. A device for carrying paint and a paint roller as described in Claim 8,
2 wherein the device further includes an insert for the second storage compartment.

1 18. A device for carrying paint and a paint roller, comprising:
2 a storage compartment made from a non-porous, durable, lightweight material,
3 having an open top, the storage compartment sized to accept a paint roller and paint;
4 a clip means for retaining the paint roller at a specified location within the storage
5 compartment such that the paint roller is not submerged in the paint;
6 a belt attachment means for attaching the device to a painter wherein the paint
7 roller is perpendicular to the body of the painter; and
8 a support element for maintaining the device in an upright position.

- 1 19. A device for carrying paint and a paint roller, comprising:
- 2 a first storage compartment made from a non-porous, durable, lightweight
- 3 material, having an open top, said storage compartment sized to accept a paint roller and
- 4 paint;
- 5 a first clip means for retaining the paint roller at a specified location within said
- 6 first storage compartment such that the paint roller is not submerged in the paint;
- 7 a second storage compartment made from a non-porous, durable, lightweight
- 8 material, having an open top, said storage compartment sized to accept a paint brush and
- 9 paint;
- 10 a second clip means for retaining the paint brush at a specified location within the
- 11 second storage compartment such that the paint brush is not submerged in the paint;
- 12 a belt attachment means for attaching the device to a painter wherein the paint
- 13 roller is perpendicular to the body of the painter; and
- 14 a support element for maintaining the device in an upright position.
